Text Folks, the United States Corporation is finished... according to its owners (incorporated in Puerto Rico)... Nobody can fix it. The big cycle was due Febuary 16 - 2020, and not a single country paid their dues (700 trillion worth). The U.S. election theft can be traced to the Venitian Black Nobility (the Black Sun), of which Mike Pence is a servant of. Biden didn't win shit. The question is: what are we going to replace it with? 1)To restore the US Republic, the living standard will severely drop... Without the elites' fake money and all. 2)The US could divide into seperate countries (Texas, California, etc.) ...or 3)form a United States of America from Argentina to Canada... (better than the Rothschilds' US corporation... Ideally, it would have all resources that it wouldn't need China at all. This would also lead to military bases closing around the globe. This would also bring about the creation of real democracy... and round-up all the criminals who hijacked the United States since the fake Federal Reserve.
